

SENDING AN ABLETON LIVE PROJECT

Before sending your project, follow these steps to make sure everything arrives clean, complete, and ready to work with. Missing files or unlabelled tracks slow everything down — this checklist keeps us on schedule.

◆ ❄️ **FREEZE AND FLATTEN ANY TRACKS USING THIRD-PARTY PLUGINS**

This prevents missing sounds due to plugin incompatibility

◆ ❌ **DELETE UNUSED CHANNELS**

Keep the project clean and focused

◆ 🏷️ **LABEL EACH TRACK CLEARLY**

For example: Kick, Bass, Pads, Lead, FX, Vocal

◆ 📦 **COLLECT ALL FILES**

Use File → Collect All and Save to include all samples

◆ 📁 **COMPRESS THE PROJECT FOLDER**

Once you've saved everything... compress the entire folder to a .zip file. Make sure the folder contains: YourProjectName.als, Samples/, Ableton Project Info/, and any other important assets

◆ 📁 **UPLOAD THE .ZIP FILE**

Upload your zipped project to a file sharing service like Google Drive, Dropbox or WeTransfer. Double-check that the link works without requiring permission or login

YOUR PROJECT IS READY TO GO.

Reply to your order confirmation email with the link — I'll take it from there.
